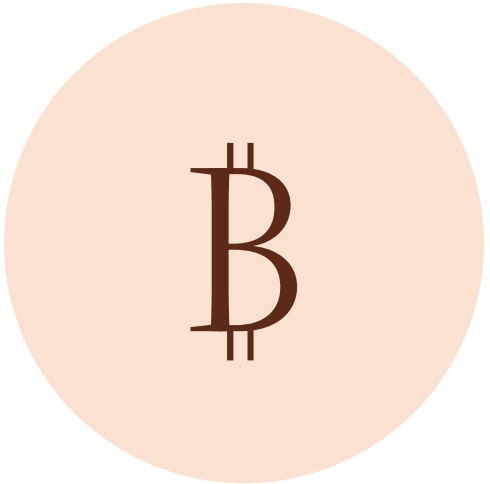
STARBIT · PADUA, ITALY

Money is changing *shape.*

You can watch it happen.
Or you can understand it.

12-month programme

starbititalia.it



LET'S START HERE

The problem isn't Bitcoin. It's the money you use *every day*.

−98%

The purchasing power the dollar has lost since 1913.

Central banks can create money with no limit written down anywhere.

Every new euro is worth slightly less than the ones already in your pocket.

Those who earn and set money aside pay the bill. Quietly, every year.

It isn't an accident. It's how the system works.

In 2009, *Bitcoin arrived.*

21,000,000

That is how many bitcoin will ever exist. Nobody can change that number: not a bank, not a government, not the people who wrote the code.

Nobody can print more of it

Inflation doesn’t touch Bitcoin: no one can increase the supply.

Your bitcoin are genuinely yours

They sit in your own wallet, with no intermediary able to freeze them.

The financial system has already taken it in

BlackRock, listed ETFs, state reserves. No longer a niche product.

Bitcoin is no longer a bet: it is a choice banks, funds and states are making. *The question now is how to move.*

Knowing it exists isn't enough. You need to know *how*.

People who invest alone almost always move at the wrong moment, with the wrong tools, and without knowing where they keep the keys to their own money.

People who don't move at all sit on cash that keeps losing value — exactly the problem Bitcoin proposes to solve.

64%

of Italians admit they know little about cryptocurrencies.

1 in 5

bitcoin is lost forever: mislaid keys, forgotten passwords.

In between sits a competence nobody teaches. *That is exactly what we do.*

The twelve month programme to close *that gap.*

Investment

€ 5,000

+ VAT · everything included

Duration	12 months
Format	In person and remote
Support	Up to 4 hrs a month
